

INFORMATION FOR FOREIGN APPLICANTS

About the educational institution

Poltava region has long been famous for its writers and scientists, historical events, developed agrarian-industrial complex. But the special pride of Poltava today is its gas and oil industry. A significant number of highly qualified specialists are needed for this branch development, which is why, in the territory of Poltava, back in 1967, the Poltava Oil and Geological Prospecting Technical School was founded.

In our time, the Poltava Oil and Gas College of Poltava National Technical Yuri Kondratyuk University is a public institution that has graduated over 50 years more than 14 thousand specialists for oil, gas and processing industry, which with their professionalism have confirmed the high quality of college education.

Today the college trains junior specialists in almost all specialties for the oil and gas industry and the processing industry of the fuel and energy complex, in particular:

103. Earth Sciences

- Prospecting of oil and gas fields;

184. Mining

- Borehole drilling;

185. Petroleum engineering and technology

- Operation of oil and gas wells;
- Operation of gas and oil pipelines and gas and storage tanks;
- Maintenance and repair of oil and gas fields equipment.

Educational process with students is provided by highly qualified faculty with the highest category, including candidates of science, methodologists which guarantee students a knowledge of high level.

For students, college has introduced and actively uses distance learning technologies, network technologies based on the use of telecommunications networks to provide teaching materials and interactive cooperation between faculty and students.

For foreign students during the exam sessions are provided college dormitories, which are located next to the educational building.

College graduates can continue their studies at the Poltava National Technical Yuri Kondratyuk University.
